Supporting new social contracts for dysfunctional Middle Eastern states - instead of fictitious *nation building*

26th International DAVO Congress

Hamburg, Germany, 9.00h-18.30h, 04 October 2019

Bernhard Trautner

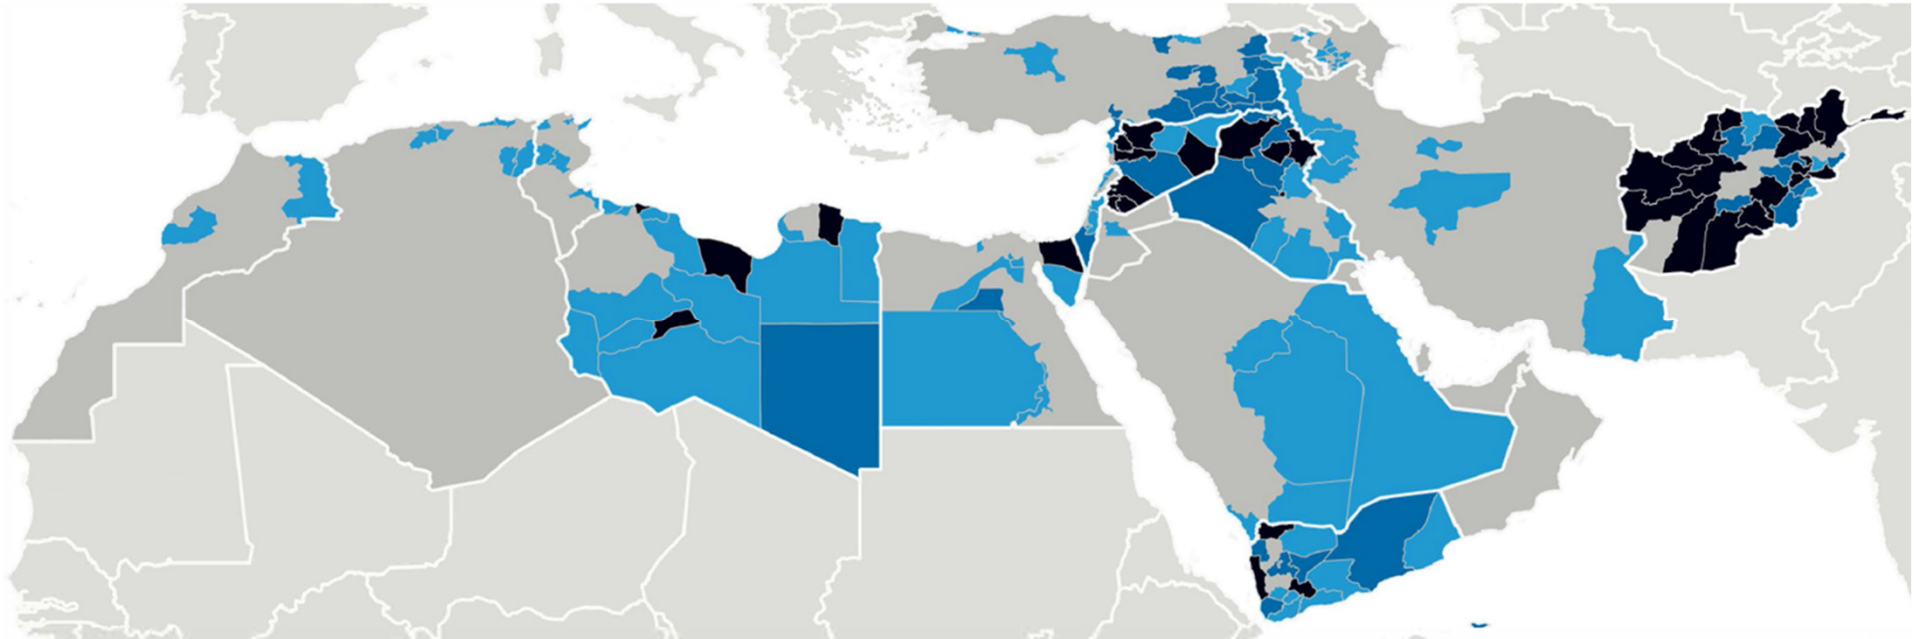

- 1) Introduction – challenges to peace: state failure
- 2) Three non-exclusive modes of framing the state:
 - a) (nation)state
 - b) state fragility
 - c) social contract (SC)
- 3) Core deliveries of the *Social Contract* in Iraq over time
- 4) Towards a new contract for reconstruction in Iraq 2019
- 5) SC's specific value for analytical framing

Three main challenges to peace in MENA

- 1) Conflict and war: transforming the state in MENA
- 2) (Re-?) building:
 - a) state and/or nation
 - b) peace
- 3) Peacebuilding as recalibrating state – society relations
→ Reconstruction or re-invention of the state?

Violent Conflicts in MENA 2018

Source: HIIK [Conflict Barometer 2018](#), S. 158

Heidelberg Conflict Barometer - Methodology

THE CONCEPT OF CONFLICT INTENSITY

intensity Level	terminology	level of violence	intensity class
1	dispute	non-violent conflicts	low intensity
2	non-violent crisis		
3	violent crisis	violent conflicts	medium intensity
4	limited war		high intensity
5	war

Observed frequency of conflict types in MENA 2018

Source: [HIIK Conflict Barometer 2018](#), S. 161

Framing the challenge: (nation) state (mode a)

- *Public law* definition of the sovereign state (cf. [Jellinek 1905: 381-471](#)) by its:
 - 1) territorial confines (,*Staatsgebiet*‘)
 - 2) monopoly of power (,*Staatsgewalt*‘)
 - 3) polity (,*Staatsvolk*‘)
- recent (disputed) addition in *international law*: *R2P* (,responsibility to protect‘, or else: foreign intervention)
- global normative framework of *SDG16*: „just, peaceful and inclusive societies” (transactional element)

Three modes of framing the challenges

a) the (*nation*) state: static perspective, ‚top-down‘

b) state fragility: vertical perspective but dynamic

→ states as ‚containers‘

→ ‚*national*‘ self-determination, only?

c) the *social contract*: transactional perspective,
vertical and horizontal perspective, multi-dimensional

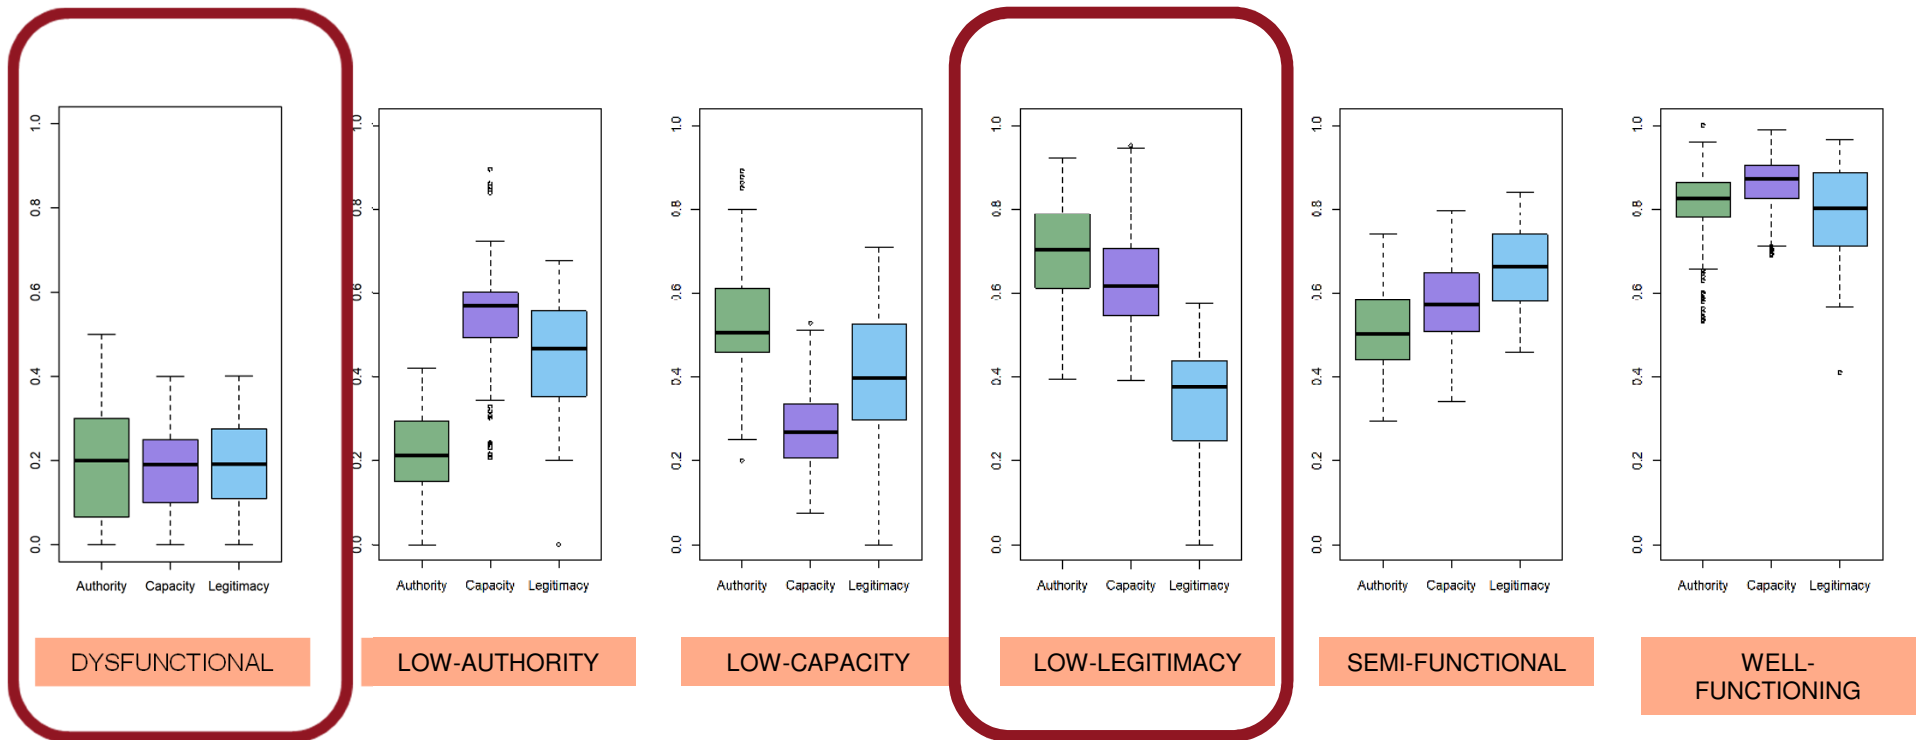

→ sub- and trans-national, functional self-determination,
geo-politics and geo-economics play a role

State Fragility Constellations: 2005-15

**SYR, IRQ,
LIB, YEM**

MENA

CONSTELLATIONS
of
STATE FRAGILITY

www.statefragility.info

- focus on state-society relations but: ‚flip side‘ of state fragility
- **Definition:**

“*social contracts as explicit or implicit, formal or informal or mixed **agreements between the various groups that make up a society and the government (or any other actor in power) defining their rights and obligations towards each other***”
- 2014ff **GDI/DIE: SC as ‚analytical lens‘ – explicit departure from normative use**

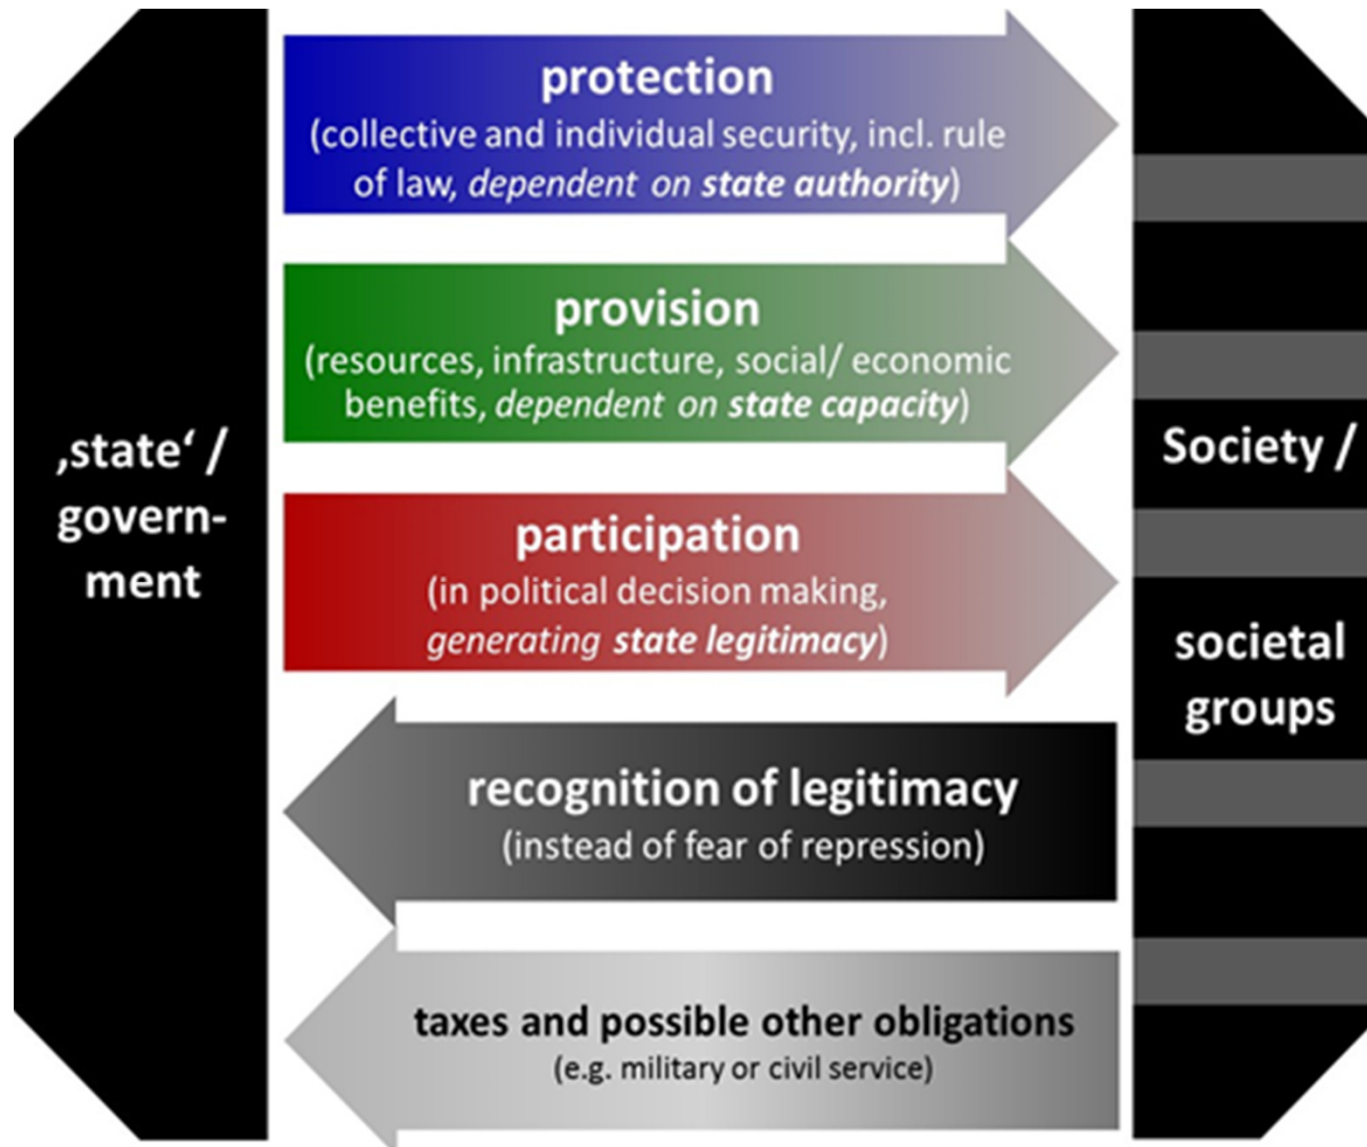

The social contract 'lens' for fragile, and conflict affected countries in MENA

Three analytical dimensions:

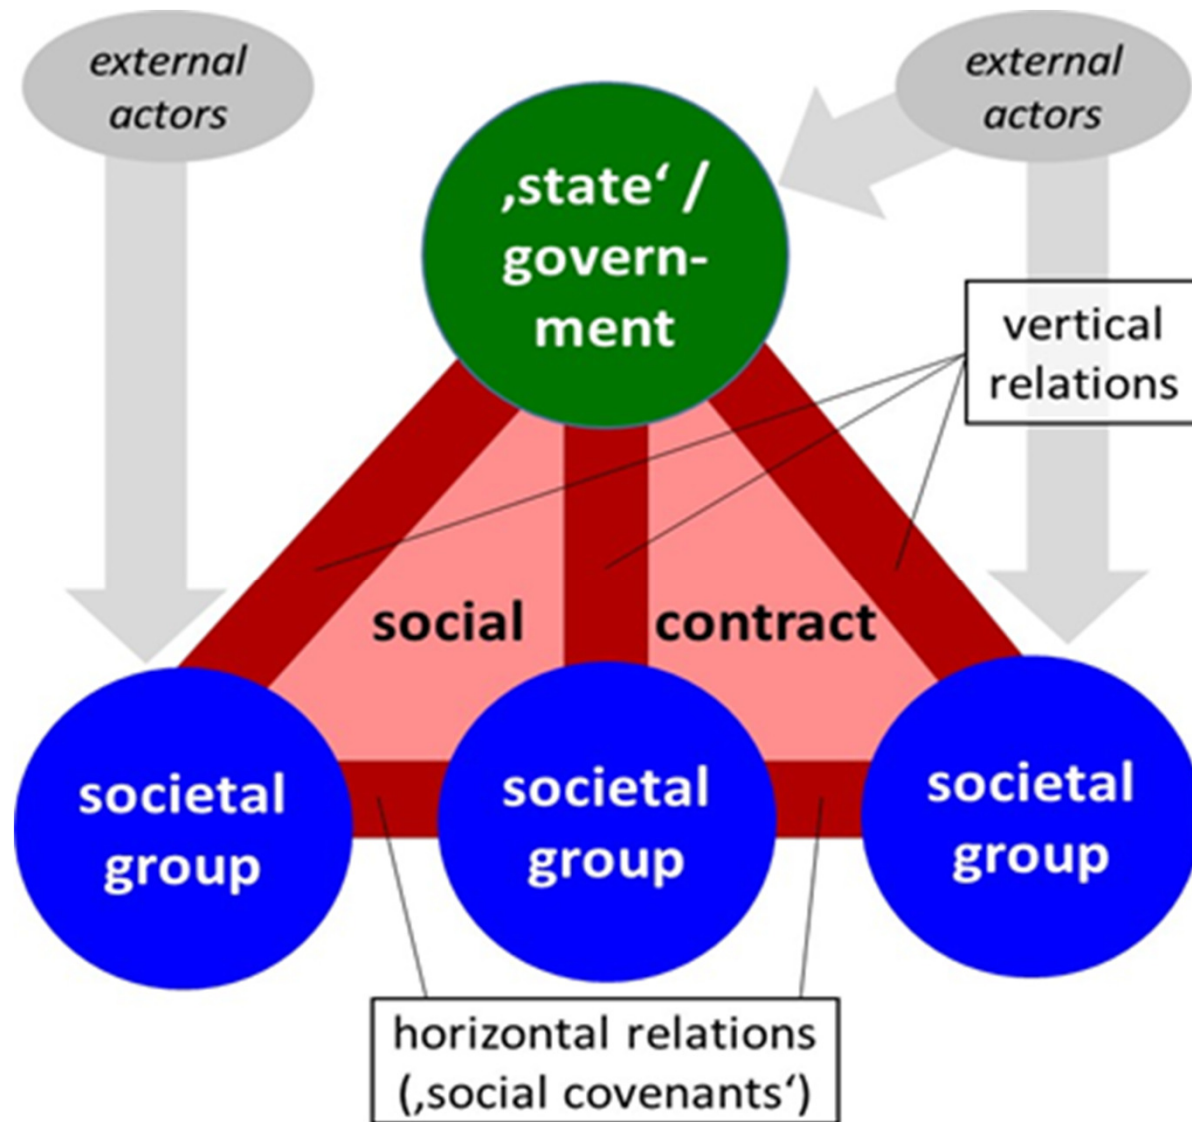

- a) *substantive* – ‚deliverables‘
- b) *spatial* – (territorial) *scope*, stake-holders
- c) *temporal* – path dependencies

Substantive dimension: 'deliverables'

Source: Loewe / Zintl (forthcoming)

Spatial dimensions: vertical - horizontal

Source: Loewe /
Zintl
(forthcoming)

- **Iraq:** SC references in deliberations on a new WB Multi Donor Trust Fund
- **Syria:** literal translation (عقد اجتماعي) for the *de facto* autonomous Kurdish Region in Northern Syria:
„a... new social contract, based upon mutual and peaceful coexistence and understanding between all strands of society..”
Framing societal autonomy at explicitly sub-national level
- **German Development Policy: all new TC & FC interventions** in MENA to be assessed under ‚SC-lens‘ as of 2017

A national SC? % defining themselves as Iraqis, above all – before 2014!

Adressing grievances

Mourners carry the coffin of a protester, who was killed in Tuesday's demonstrations in Baghdad, during a funeral in Najaf, Iraq, October 2, 2019. [REUTERS/Alaa Al-Marjani](#)

New Social contract(s) ? Address the expectations of the people – AB Wave V

Field period:	24 December 2018 to 27 January 2019
Language:	Arabic
Target population:	Citizens aged 18 and above
Excluded populations:	Institutionalized populations; internally displaced persons in refugee camps; destroyed homes, and unfinished residences; Governorates Dohuk, Halabja, and Muthanna excluded
Sample design:	Stratified area probability sample
Sampling frame:	Population estimates provided by the Iraqi Ministry of Planning and the Central Statistical Organization of Iraq
Strata:	Governorate and areas
Number of strata:	32
Number of governorate:	19-3
Areas:	urban and rural

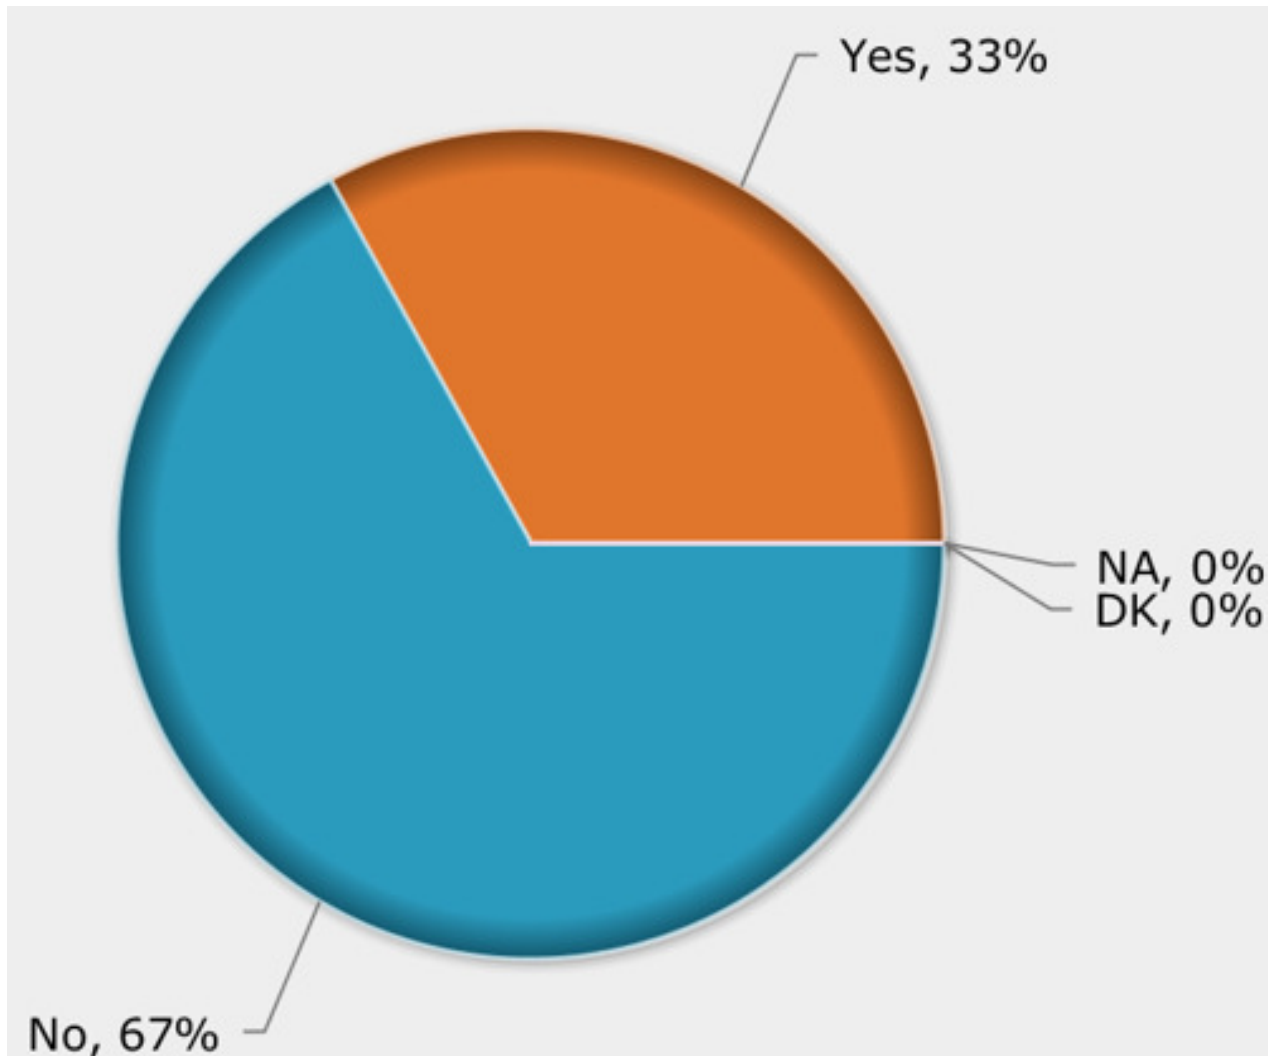

New Social contract(s) ? Address the expectations of the people – AB Wave V

Primary sampling unit selection:	Probability proportional to size in urban areas; simple random sample in rural areas
Household selection:	Systematic skip interval of households with random starting point
Respondent selection:	Last birthday
Mode of data collection:	Computer Assisted Personal Interviewing (CAPI); Interviewer Administered Paper and Pencil Interviewing (PAPI) in Erbil
Number of observations:	2,462
Response Rate:	86.7% (AAPOR Cooperation Rate)
Local Partner:	Independent Institute for Administration and Civil Society Studies

Arab Barometer Wave V Technical Report 2018-2019, p 4

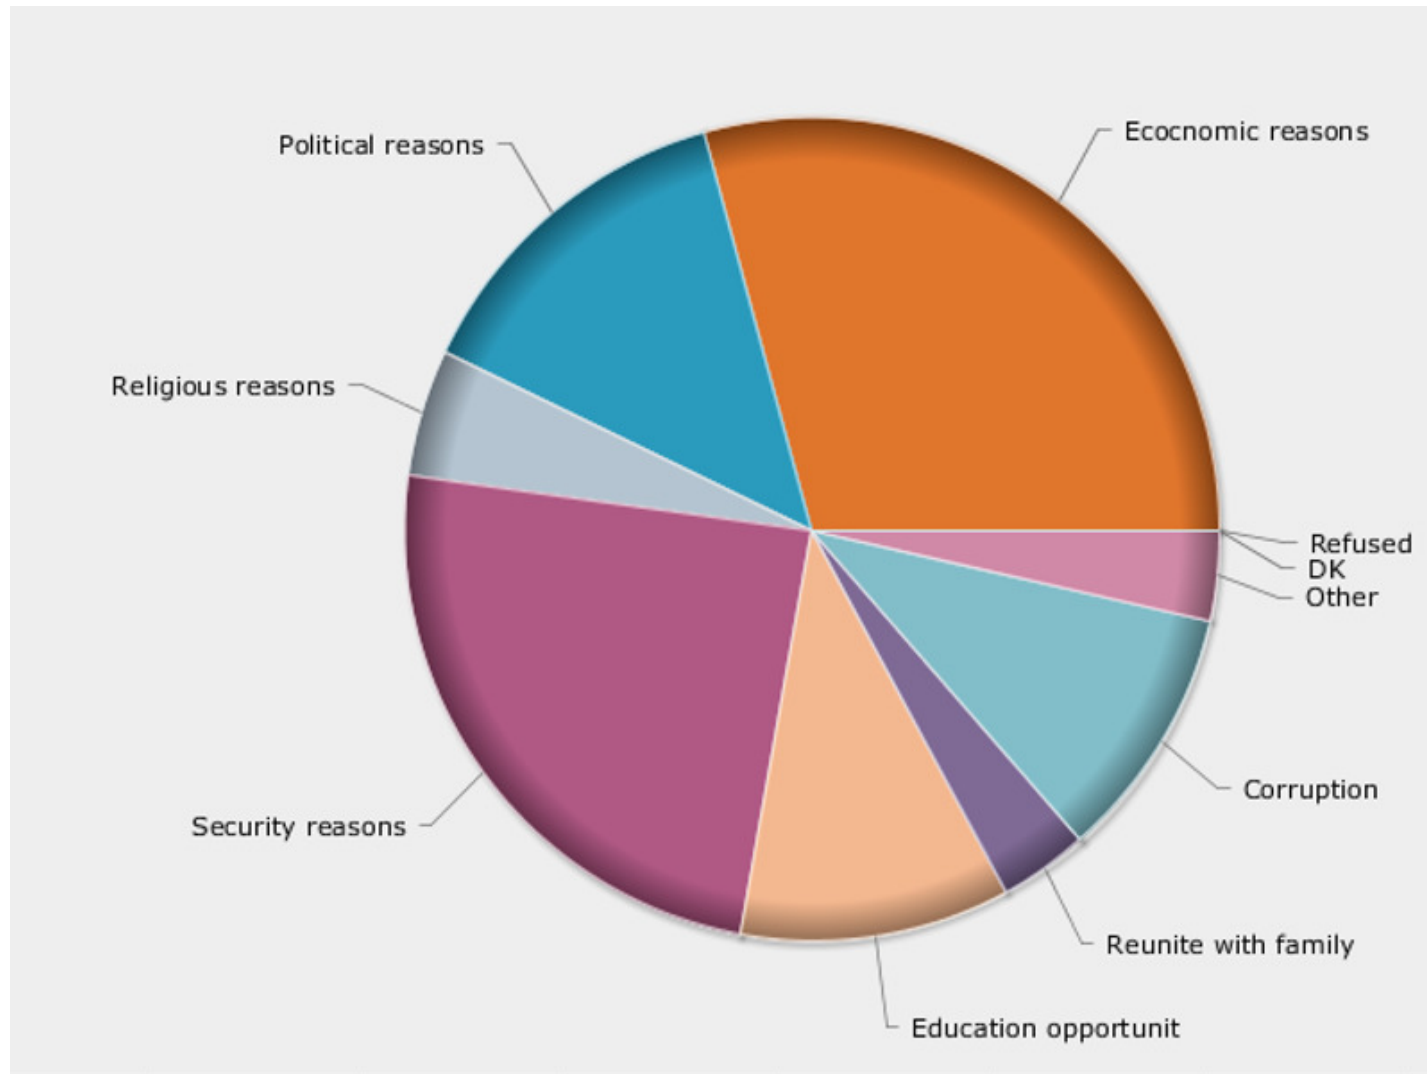

Considered to exit the Iraqi social contract in the past (2018/19)? 37% - > 10m people

Data: Arab Barometer Wave V

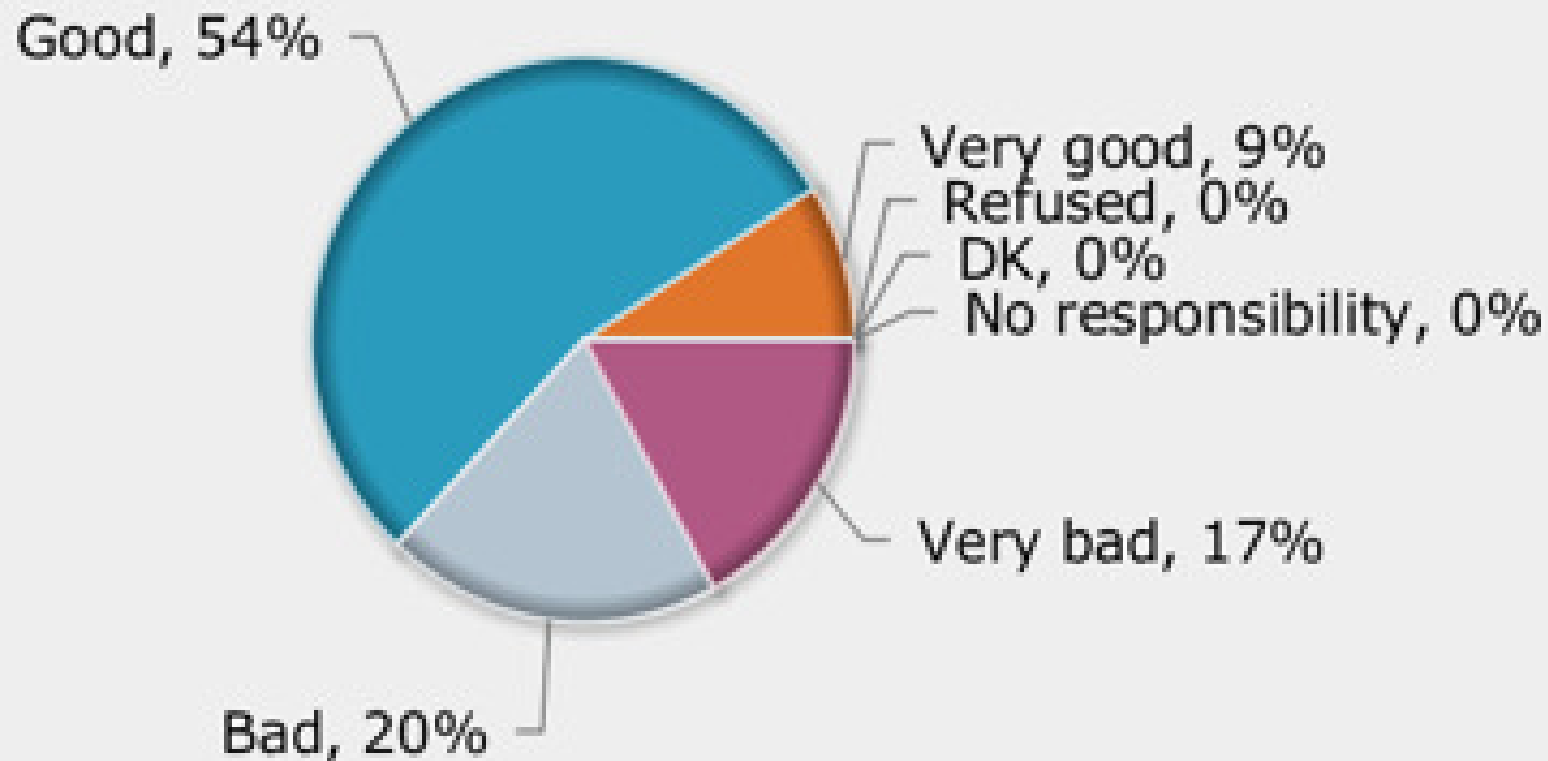

Exiting a social contract: individual reasons

a) (in-)security b) economic c) political

Data: Arab Barometer Wave V

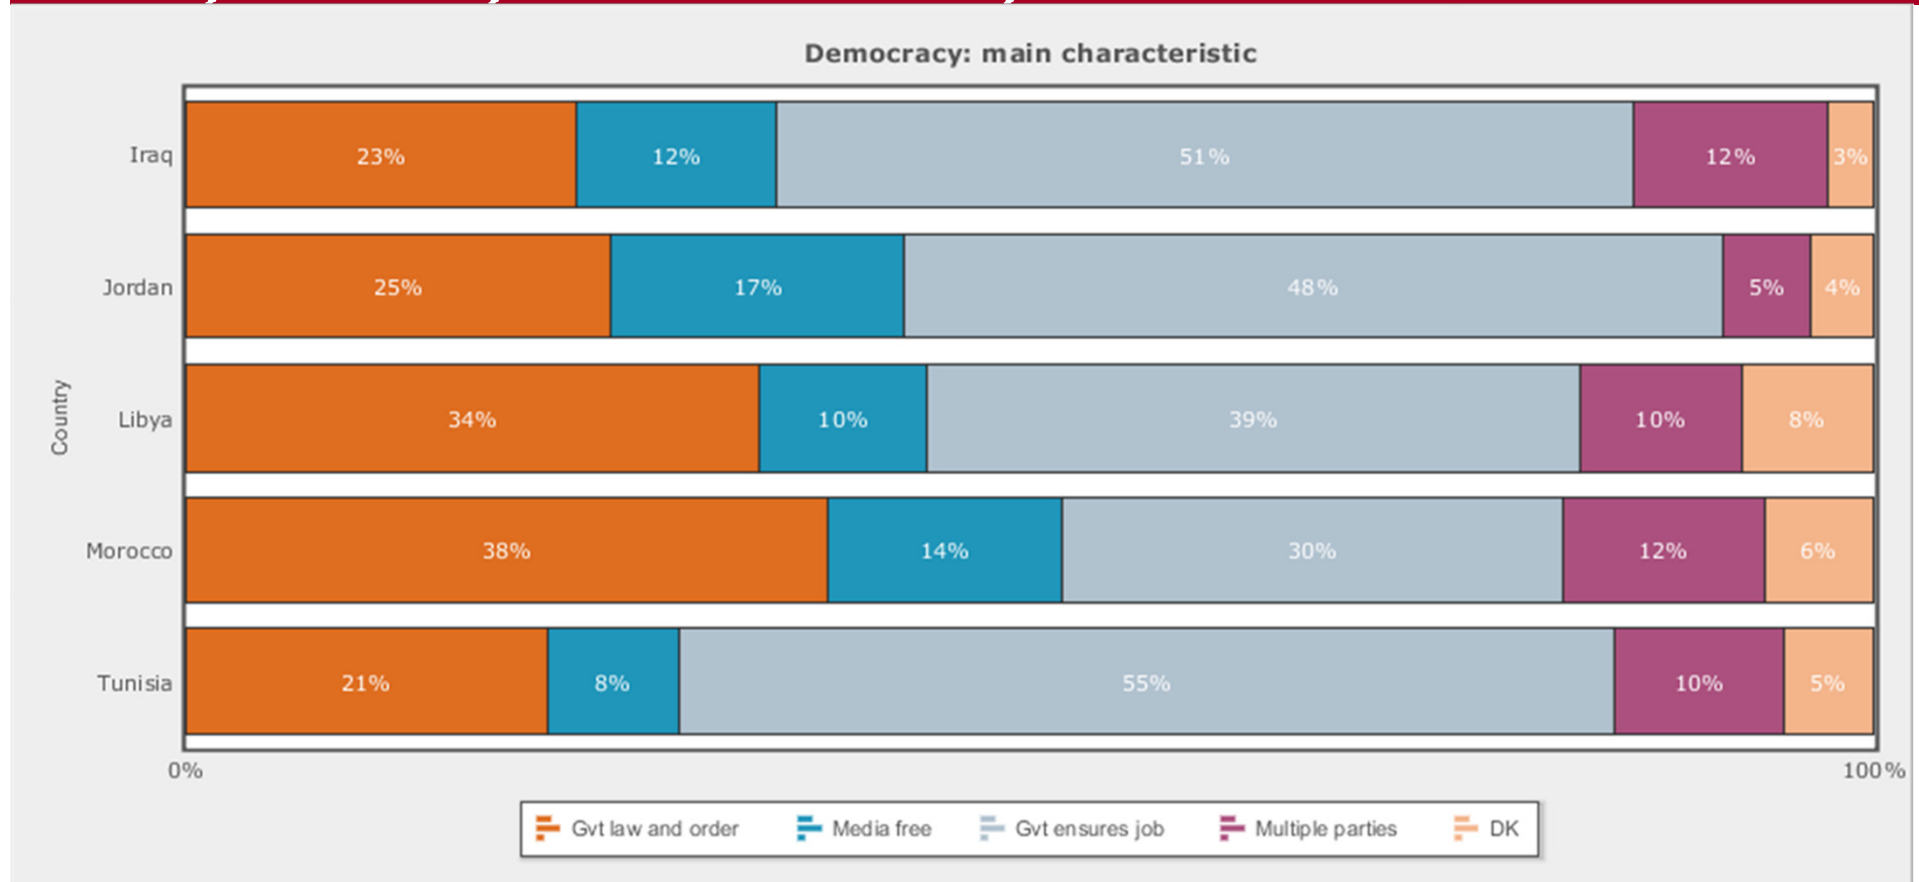

Satisfaction with the current government's performance: Providing security and order

Data: Arab Barometer Wave V 2018/19

Purpose of/ expectations from democracy ?

1) Jobs 2) law & order 3) free media

Data: Arab Barometer Wave V 2018/19

Deliveries in Iraq: *provision* by public sector employment (2004-2016)

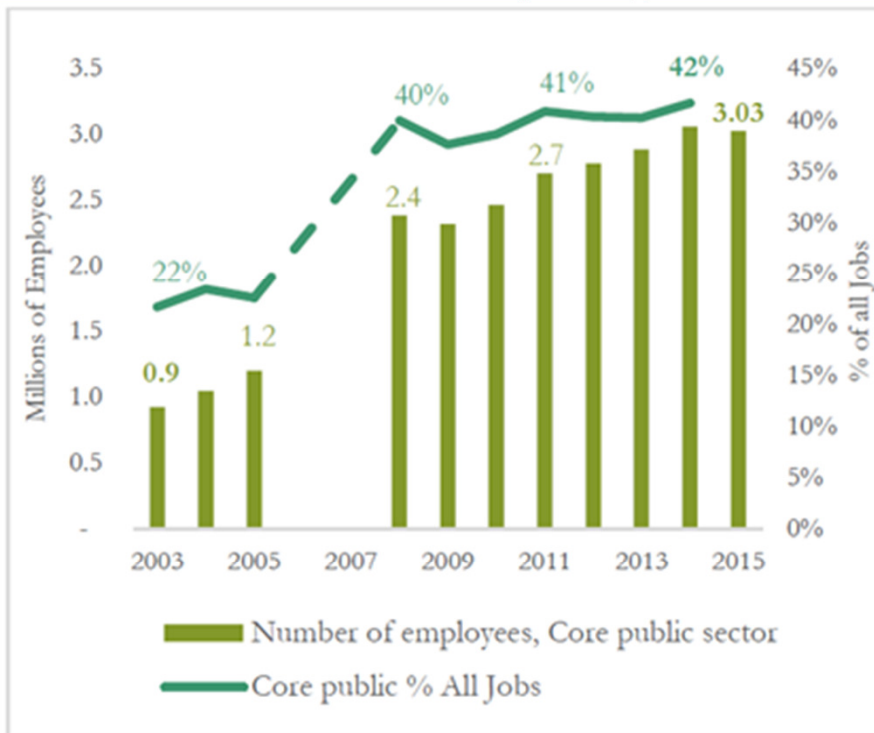

Sources: Ministry of Finance, Iraq, and IMF staff estimates and projections.

Satisfaction with the Iraq government's performance: Creating job opportunities

Data: Arab Barometer Wave V 2018/19

Iraq's challenges towards a new contract for reconstruction 2019 (1-2)

Narrowing the gap between expectations and delivery – engage in quality service & with non-conventional stakeholders:

- **substantive dimension – deliver better:** basic services and human security, in particular in ,liberated‘ areas and Basra – **or else:** da‘esh 2.0
- **spatial dimension:**
 - **engage stake holders: domestic** GoI, KRG, DPK, PUK, PMFs. **External:** US, IRN, TUR
 - **territorial scope & statal function / delivery:** build capacity and enforce accountability at decentralized level

Iraq's challenges towards a new contract for reconstruction 2019 (2-2)

- **consider the *temporal* challenge: a developmental perspective for breaking *path dependencies*:**
 - ‚**re-(?)construction**‘ (of what: a *nation* / a country?) vs. *peace building* (reconciling state & society)
 - **conflict cycles**: addressing grievances in Basra, and of minorities, long-standing issues of (multiple) internal displacements
 - **reduce *rentier economy* / dependency on oil ‚rent‘** by investment into: social capital / trust and in productive sectors (high quality education etc.)

Conclusion: SC's specific value for analytical framing

- **functional & dynamic vs. static perspective:**
neither conventional ,state-‘ nor ,nation-‘building
- **academic/scientific & analytical: compare**
different social contracts with respect to their dimensions:
 - substantive (similar or same core ‘deliverables’ ?)
 - spatial (same relevant stake holders, effects on each contracting party, agency of stake holder & patrons)
 - temporal (transition/renegotiation over time, disruption, ability to provide long-term stability / societal resilience)
